

Undergraduate Alcohol-Related Incident Data (2012 – 2020) January – March

Notes:

- Data are inclusive of the months indicated, and include undergraduate students only (i.e., not organizations, graduate students, or non-students).
- Numbers indicate counts at the individual student level.
- Alcohol-related incidents involving Dartmouth’s Department of Safety and Security (DoSS) and Residential Education (ResEd) are determined using Maxient (Community Standards and Accountability) and DoSS reports.
- BAC = Blood Alcohol Concentration obtained by breathalyzer or blood sample.
- Data on medical encounters and BACs are from Dartmouth College Health Service (DCHS) inpatient medical encounters and Dartmouth-Hitchcock Medical Center (DHMC) Emergency Department encounters for alcohol intoxication.
- In 2020*, due to the Covid-19 pandemic, most students were required to leave campus by March 16th, potentially impacting this termly data.
